Vehicle Protection System

What is paint protection

Paint protection is nothing new, it's been around for over 40 years. The concept of paint sealant is to protect your horseboxes paintwork finish from deteriorating, which is caused by the harmful chemicals that are contained in today's environment such as road salt, chemical fallout and acid rain which all contribute to damaging the surface and paint finish of your horseboxes exterior.

Most paint protection products only use polymer based paint sealants.These sealants are often less effective than products you can buy off the shelf in well-known car parts stores. They are based on technology developed two decades ago: amino functional fluids, which plasticize as they dry. This creates a temporary, sacrificial, soft layer on the paint surface which can wash off within 2-3 months. That is why many competing products require you to apply a preserver application every six months to a year.

What makes LifeProof different?

LifeProof is formulated from advanced Nano Ceramic technology. Our paint protection is a high gloss permanent bond Nano-Ceramic Coating that can only be applied by our network of trained approved applicators and is backed up by a lifetime guarantee*, compared to factory paintwork it utilises the latest ceramic nano-technology to give your paintwork superior Chemical Resistance, UV & Thermal Resistance and Super Hydrophobic effect. In addition a guarantee card is provided for the lifetime guarantee which is registered through our online portal.

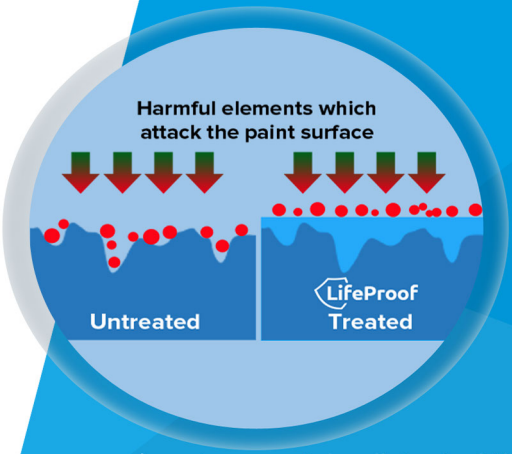
Lifetime Guarantee

*Guarantee 10 Years new horseboxes & 7 Years on used horseboxes
Guarantee does not provide cover in the event of neglect, misuse, stonechips and scratches

LifeProof Paint Protection



When examined under a microscope, the paint surface of your horsebox has a rough cross-section consisting of peaks and valleys. Over time dirt and contaminants get trapped within the paint surface, eventually causing the paint surface to oxidise and fade.

How does LifeProof work?

When applied to your horseboxes paintwork, LifeProof's polysilazane formulation interlocks its molecular structure to the paintwork, filling any imperfections and creating a highly durable high gloss ceramic protective barrier. This ceramic barrier adds protection against the sun's UV rays, acid rain, road salts, tree sap and environmental pollutants. LifeProof now gives you the freedom and choice of how you want to have your horsebox cleaned, Even jet washes can be used without the risk of invalidating your guarantee.

Paint Protection Against

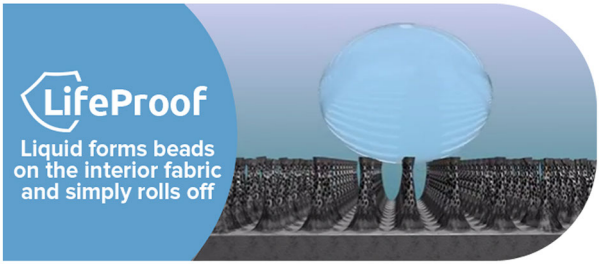
- Paint fading
- Loss of shine
- Acid rain
- Bird droppings
- Tree sap
- Insects
- Hard water stains
- De-icing materials

Benefits of LifeProof paint protection

- **Permanent adhesion**
- **Resistant to environmental fallout**
- **Chemical resistant**
- **Protects your horseboxes re-sale value**
- **UV resistant**
- **High gloss finish**
- **Easy to clean**

LifeProof Interior Protection

LifeProof fabric and class leading leather protector is the most superhydrophobic coating available that can be applied to any textile and leather surfaces. Surfaces coated with LifeProof fabric and leather protector are protected from liquid spills and damaging chemicals that may stain or discolour the interior surface. LifeProof interior protection comes from the high-tech industry and is an inorganic compound. LifeProof's interior protector dramatically reduces the surface energy, so that when liquids come into contact with it, they form beads and simply roll off. This enables the fabric and leather seat surfaces to be free from water/dust and all other liquids, without affecting the look or feel. Liquid on a surface coated with LifeProof interior protection will simply roll around on top of the fibres, allowing it to be easily cleaned up.



Interior Protection Against

- All consumable foods
- Coffee
- Chewing gum
- Make up
- Crayons
- Blood & Urine
- Pet waste
- Vomit

Benefits of LifeProof interior protection

- **Permanent adhesion**
- **Makes spills easy to clean up**
- **Advanced leather protection**
- **Protects your horseboxes re-sale value**
- **Hypo-allergenic**
- **UV resistant**
- **Non-aerosol**

Optional Supremecoat / LifeProof Products

Maintenance

Supremecoat Vision Glass Treatment
Supremecoat Vision windscreen glass treatment greatly improves visibility when driving in rain, sleet and snow. This is achieved by the formula sealing the microscopic pores in the glass, creating an invisible super-hydrophobic layer which repels water from the glass surface. The treatment is suitable for all glass surfaces.

Bird Lime Remover
Bird lime on horsebox paintwork is not only unsightly and unhygienic, it is also corrosive due to its uric acid makeup. Acidic reactions begin to happen almost immediately, so time is of the essence to ensure damage does not occur to your paintwork. Supremecoat bird lime remover softens and neutralises, allowing them to be removed quickly and easily with a microfiber cloth.

Supreme Shampoo
Get the perfect finish to your horsebox using Supreme Shampoo. Specially developed for maximum cleaning effect with minimal effort. The shampoo is a luxurious pH neutral rich gloss enhancing shampoo that works in perfect harmony with polymer and ceramic paint protection.

Security

Supremecoat DNA
The Supremecoat DNA kit doesn't just help recover your horsebox in the event of theft, it helps prevent theft from ever taking place. Our DNA protection system has been Thatcham quality assured.

Key Recovery
Supremecoat key recovery enables customers to securely tag and register their keys, so that if lost, they can be reunited with their owners quickly and hassle free. Supremecoat key protectors carry no personal information but instead have a unique identification number which links you and your keys 24/7.

Wallet Recovery
Purses and wallets are almost like miniature filing systems, packed with money, credit and debit cards, receipts and personal effects. So it makes sense to protect your wallet with Supremecoat wallet recovery card, if lost the wallet can be reunited quickly 24/7.
