Supremecoat Marine Treatment System

Why choose Supremecoat Marine treatment?

The marine life is a testing environment. The high corrosiveness of salt, UV rays, acids, alkalis, exhaust and algae/shell contaminants can cause cosmetic and structural damage that impair your performance and ruin your vessels appearance.

Formulated from advanced Nano liquid ceramic technology, Supremecoat Ceramic Marine protection is designed to offer the ultimate paint protection for all marine vessels.

“Our finest made marine treatment system is now available. Following years of extensive research and testing, your vessel will benefit from the advancements in ceramic treatment technology”

Supremecoat Marine Treatment

How does Supremecoat Marine Treatment Work?

Upon application you can have the utmost confidence that your vessel will be rendered virtually immune to the adverse weathering effects of both underwater and above-water environments, conditions and elements. We only use the best professional coating technology available on the market. Supremecoat has over 20 years of exterior paint & interior protection experience. This valued knowledge empowers us to deliver the next generation of advanced protection treatments. Insist on Supremecoat Ceramic then there will be no looking back.

Benefits of Supremecoat Marine

Shield Against Corrosives

Supremecoat Marine provides your vessel with hydrophobic properties that prevent spotting and make cleaning dirt and debris fast and easy.

UV Ray Protection

Supremecoat Marine provides the maximum UV ray protection to prevent unsightly damage associated with aging and fading colours.

Highest Degree of Hardness

Supremecoat Marine registers over 9H on the industries hardness scale - equating to a coating that provides an exceptional level of paint protection.

* To gain up to 3 years protection, the product MUST be applied in accordance with Supremecoat's application guidelines. Upon application an authenticity certificate will be supplied to the vessel's owner.
